LIBRASCOPE INCORPORATED ■ 808 WESTERN AVENUE, GLENDALE 1, CALIFORNIA

CITRUS 4-6541 • CHAPMAN 5-7511

February 11, 1959

Mr. C. A. Sorensen
1017 Western Avenue, #1
Glendale, California

Dear Carl:

The substantial rise in the number and value of development contracts awarded to Librascope in the past few months promises to continue as more of our pioneering proposals to customers reach the decision stage. This means that we have not only new opportunities for our present engineering staff, but additional openings for engineers to expand the sound organization we have been building.

From personal observation I know that our best applicants are those introduced by our own employees. Therefore, I am relying heavily upon each member of the Engineering Division for assistance in filling new positions with the most competent people.

At present there are about fifty open positions for qualified EE's, ME's, Mathematicians or Physicists with experience in the following fields: transistor circuit design, logical design, mathematical analysis, programming, servos, mechanical design including electronic packaging, and data processing.

I am personally asking you to assist us by recommending at least one engineer whom you know would be a good person to have on our team. Simply send me a note with your name, and the name and home address of the prospect, and I will see that an interview is arranged.

Let me assure you that your candidates will be shown every consideration in a thorough and confidential interview. And let me assure you also that your assistance will be personally appreciated, not only for its direct contributions, but because it will help the healthy expansion of our engineering organization -- now considered as one of the best in our industry.

Sincerely,

D. C. Webster

VICE PRESIDENT, ENGINEERING
