Attention: Mr. W. Picker, President

Dear Walt:

It is with much pleasure that I announce that SPAWAR has authorized GE to proceed with the development and implementation of the Value Engineering change V16G002 entitled EWEGO Disk.

GE and Singer Librascope have worked very hard and long to achieve this major milestone. Together as a Team, we have conquered all impediments and adversaries and have taken "Victory out of the jaws of Defeat".

Congratulations to the entire Singer Team for their dedicated support and tenacity in developing the concept and proposal for the EWEGO Disk.

Singer Librascope has played a very important role as a Team Member of the GE/RCA Trident Integrated Radio Room by supplying Mass Memory Systems over the past seventeen years. I am sure that this Team Relationship will continue during the development and manufacturing of the new EWEGO Disk.

GE is looking forward to a very successful program.

As Programs Manager of the IRR Program you have my personal commitment to do everything possible to maintain our corporate team relationship.

Again I would like to thank everyone at Singer who participated in this Value Change. I think the following personnel deserve a special recognition for their outstanding performance.

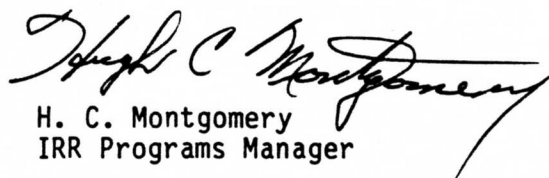

Don Barton
Karl Fetterhoff
Doug Hodgdon
Vic Netupsky

Steve Sheppard
Carl Sorensen
Howard Stahle

Both GE and Singer are recognized by SPAWAR as Value Contractors and will reap the benefits of Victory.

Thank you again and good luck.

Yours truly,

H. C. Montgomery
IRR Programs Manager
